PROFESSIONAL SUMMARY

Full Stack Developer and B.Sc. Computer Science graduate (2026) with hands-on experience developing web and mobile applications using Java, Spring Boot, React.js, Flutter, Python, FastAPI, and PostgreSQL. Built projects involving REST APIs, JWT authentication, database design, market analytics, and AI-assisted certificate verification using OCR and document analysis. Experienced with Git/GitHub, Postman, API testing, and responsive UI development. Seeking a Full Stack Developer or Software Engineer role.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, Dart, HTML5, CSS3
Frontend & Mobile: React.js, Next.js, Flutter, Tailwind CSS, Responsive UI/UX
Backend & APIs: Spring Boot, FastAPI, REST APIs, JWT Authentication, Authorization, Session Management
Databases: PostgreSQL, SQLite, SQLAlchemy, Relational Database Design, Indexing, Query Optimization
AI & Document Processing: OCR, EasyOCR, Tesseract OCR, OpenCV, Rule-Based Fraud Analysis, QR Verification, SHA-256 Hashing
Tools & Testing: Git, GitHub, Postman, Pytest, Playwright, VS Code, IntelliJ IDEA, Android Studio, Jira

WORK EXPERIENCE

Full Stack Development Intern | DevHorizon Technologies | Bangalore, India

- Developed responsive web application interfaces using HTML5, CSS3, and JavaScript, integrating frontend components with Java-based backend services.
- Designed and tested RESTful APIs with Postman to validate request/response behavior and support client-server communication.
- Created relational database schemas and SQL queries in PostgreSQL, applying data validation and query optimization practices.
- Collaborated with senior engineers on debugging, code reviews, software design, and Git/GitHub version-control workflows.
- Worked with authentication, authorization, and session-management concepts across full-stack modules.

PROJECTS

CertiVerify AI – Certificate Fraud Detection & Verification System | *React.js/Next.js, TypeScript, Python, FastAPI, SQLAlchemy, EasyOCR, Tesseract OCR, OpenCV, JWT, QR Verification, SHA-256*

- Designed an AI-assisted certificate verification workflow to assess uploaded certificate documents and classify results as Genuine, Suspicious, or Fake based on configured evidence and rules.
- Used OCR technologies (EasyOCR/Tesseract) and image processing concepts with OpenCV to extract certificate text and support document-tampering analysis.
- Outlined verification checks using extracted fields, QR-code data, duplicate/similarity checks, and certificate-hash comparison against trusted blockchain records where configured.
- Planned a Python FastAPI REST backend with JWT-protected API access and SQLAlchemy-backed certificate records; testing stack includes Pytest.

National Market Reports (NMR) – Trading Platform Mobile App | *Flutter, Dart, Java, Spring Boot, PostgreSQL, REST APIs, JWT, Postman, Git*

- Built a cross-platform Flutter application for iOS and Android to present market reports, stock tickers, trading indicators, and market summaries.
- Developed Spring Boot REST endpoints for portfolio management, trade execution, and automated report generation.
- Designed normalized PostgreSQL tables for market data, historical stock records, user watchlists, and transaction logs, using indexing to support efficient queries.
- Implemented Flutter state management, JWT-based authentication, data validation, and interactive charts for price trends and market indicators.

EDUCATION

B.Sc. Computer Science | Sri Krishna Arts and Science College, Bharathiar University | 2023–2026 | CGPA:7.0

CERTIFICATIONS & TRAINING

Full Stack Developer Certificate – LinkedIn | Python in Data Analytics – Amypoo | RAISE SMART Workshop (RGF): Python in Analytics
